

Project Management Professional (PMP)® certification path (Online + Face-to-Face)

Plan, execute and complete successful projects within your team and your organization. This programme also prepares you to undertake the Project Management Professional (PMP) certification exam.

#Management #Project Management #blended #Up to 2 months #Turin Campus #Virtual Campus

Introduction

This course walks participants through the nuts and bolts of project management, from setting priorities to controlling expenses and reporting on results. It provides support and practical activities and useful examples to help participants apply these skills to their daily work.

The course is delivered in collaboration with the Project Management Institute (PMI)®, a registered and accredited provider for PMP certificate preparation. Taking the PMP certification exam is optional and not included in this course.

Objectives

Upon successful completion of this course, participants will be able to:

- Describe basic concepts and principles of project management
- Recognise different styles of influence and adopt different approaches in order to increase influence with their team and stakeholders
- Identify the preparatory steps for any type of project and define clear project goals
- Apply concepts and techniques to develop accurate project estimates and schedules
- Identify and assess the risks involved in project management, by performing qualitative risk analysis and planning risk responses
- Develop effective communication skills to allow accurate project status reporting and project closing

Course Contents

Online sessions

• Week 1 – Key Concepts of Project Management: In this session, we introduce the programme and walk through key concepts that are relevant, regardless of the types of projects you work on or your level in the organization. Also, we will talk about the people side of project management. Our team members and stakeholders have unique tendencies and preferences that influence how we interact with them. We discuss how recognizing different styles and modifying our approach accordingly can significantly help us influence our project sponsor, team, and stakeholders.

• Week 2 – Project Planning: It can be tempting to just start working on a project without doing sufficient planning. How can we best start a project with momentum while avoiding the paralyzing effects of over-analysis? This session discusses best practices for initiating and planning a project.

• Week 3 – Work Breakdown Structure and Planning Tools: Projects almost always require more work than originally anticipated. This session focuses on how to more fully understand all the work that is required for a project. We also discuss techniques and concepts to help you develop more accurate estimates.

• Week 4 – Project Risks and Contingency Planning: Every project has dependencies and risks that must be considered in order to successfully manage expectations and deliver successfully. This session discusses best practices in scheduling and risk management. We also have a practical discussion about the critical path, including what it is and how it can help you stay on track.

• Week 5 – Project Status Reporting and Project Closing: As projects continue towards completion, it is important to keep people up-to-date with project status. In this session, we will discuss some of the important lessons in project status reporting and project closing. We will also talk about the challenges and opportunities in creating a culture of project delivery.

Face-to-Face sessions

- 5 and 6 November. Advanced Project Management course.
- 7 November. PMP Exam Prep course.
- 8 November. A half-day Foundations of Agile Project Management.

Course Methodology

The course combines instructor-led sessions with a face-to-face classroom-based session. The combination of the online and face-to-face qualify participants for the PMP certification path. These two courses prepare participants for Project Management Professional (PMP)® Exam.

The PMP application requires 35 contact hours of project management education. This course (online and face-to-face) provides the required contact hours and information you need to apply and prepare for the exam.

1. Project Management Essentials (online): 10 hours

The Project Management Essentials online course is a practical way to get a head-start on your certification preparation. These 10 contact hours of training provide practical insights and teaching on topics such as Initiating a project, Project Charters, Work Breakdown Structures, the People Side of Project Management, Critical Path, Risk Management, and more.

2. Advanced Project Management (face-to-face, Turin): 14 hours

The Advanced Project Management face-to-face course is a combination of nuts-and-bolts theory and practical lessons learned, all packaged in a fast-paced, highly interactive session to get you and your organization on track to consistently deliver successful projects. These 14 contact hours of training will help you understand some of the more challenging exam areas, such as Cost Management (including earned value), Procurement Management, and Quality Management.

3. PMP Exam Preparation (face-to-face, Turin) 7 hours

The PMP® Exam Preparation course is a day focused specifically on passing the PMP® or CAPM® exams. The course applies what you learned in the Project Management Essentials and Advanced Project Management courses in order to prepare to pass the examinations. The course includes a copy of the latest PMBOK® Guide and one of the top exam prep study guides.

4. Foundations of Agile Project Management (face-to-face, Turin) 4 hours

The Foundations of Agile Project Management course is a half-day introduction to agile project management. Agile has quickly become the go-to project management approach for a wide range of industries. In this course, you will be introduced to agile project management, including the core values and principles outlined by the Agile Manifesto. The fast-paced, highly interactive half-day course discusses common myths and misconceptions about agile approaches, identifies factors to consider when deciding whether to adopt agile practices, and includes a simulation to apply what you learn.

These courses provide you the 35 hours of formal training you need to pass the PMP® or CAPM® certification exams. This offer benefits participants looking to get certified in the near term.

The **online component** will take 5 weeks with five webinar sessions. Each week, participants go through assigned modules and reading materials, complete weekly assignments and exercises, and post to discussion forums to share experiences, questions and comments, and receive feedback from the instructors.

The webinar sessions will be conducted on the WebEx online platform. Self-paced modules and discussion forum for each week of the course will be designed and structured on the UNKampus, UNSSC's Learning Platform.

Participants need a computer (or mobile device), a reliable internet connection and either headset with microphone to connect to the audio through the computer, or a telephone. We recommend accessing audio through the computer. No special software is required, but participants must be able to access WebEx, so please check the admin rights on your computer. We will send instructions for WebEx access to registered participants. We recommend you download the application and test your access in advance.

The five synchronized online sessions are from 2:00 pm – 4:00 pm Rome-time (8:00 am – 10:00 am New York-time).

Thereafter, participants will attend 3.5 days **face-to-face** session to complement learned skills, practice and receive
