

## Decentralized Governance and Peacebuilding - March

A tutored online programme exploring the contribution that decentralization and local governance can make to peacebuilding.

**#Sustaining Peace #Conflict Prevention #Decentralized Governance #Governance #SDGs #online #Up to 2 months #Virtual Campus**

### Introduction

Local governments are often the first to collapse when factions fight for territorial control. In post-conflict settings, the state is often unable to effectively reach parts of its territory for years. Given these challenges, it is no surprise that decentralization and local governance provisions are increasingly prominent in peace agreements and national post-conflict peacebuilding agendas.

This online course explores how decentralization contributes to peacebuilding and identifies the elements of local governance that are most relevant in a post-conflict/peacebuilding context. Concrete case studies are used to illustrate successful decentralization reforms and peacebuilding efforts at the local level.
