Learn knowledge management strategy, processes, components, best practices and tools for capturing and refining knowledge assets. Understand in what forms knowledge exists, and create and share processes to meet organizational goals.

Introduction

The course is designed to equip UN staff with enhanced skills in applying knowledge management tools and techniques in the UN context.

Objectives

Upon successful completion of this course, participants should be able to:

- Describe a range of skills, methods and techniques to enhance individual and collective performance in developing programmes and delivering sustainable and effective results;
- Give examples of how knowledge management can boost individual and collective effectiveness in their particular context, as well as from an organization’s perspective;
- Identify “quick wins” and use appropriate knowledge management techniques to foster dialogue and collaboration, identify good practices and facilitate access to pockets of knowledge within their respective context.

Course methodology

This course is delivered entirely online. It is a self-paced course that participants can start at any time and complete activities at their own pace. Once they receive the login information, participants are required to complete all activities within four months. To receive a certificate, they will be required to complete an end of course questionnaire. There is no weekly webinar in this course.
Course contents

The self-study course consists of the following lessons:
