Take your project management career to the next level with our exclusive bundle offer!

Master the art of delivering successful projects while navigating change with confidence. Enrol in both the **Project Management Professional (PMP) Certification Path** and the **Change Management Fundamentals for Project Managers** courses to gain the skills to lead with impact.

Plus, enjoy the **special price** reserved for signing up to both programmes.

Introduction

Project success is the key to achieving the 2030 Agenda and the Sustainable Development Goals. The Project Management Professional (PMP) Certification Path provides participants with the professional skills and knowledge to plan, execute and complete successful projects within your team and your organization. For more details: Project Management Professional (PMP) Certification Path

Change Management Fundamentals for Project Managers is your gateway to mastering the intricate dance between project and change management. Our training will give you the tools you need to make smart decisions around change management as a project manager, and provide you with the knowledge to increase the chances of achieving the organizational benefits of your project. For more details : Change Management Fundamentals for Project Managers

Why choose the bundle?

- **Comprehensive learning** – Gain essential project management skills while mastering change management strategies.
- **Exclusive savings** – Instead of paying **USD 3,500** when enrolling separately, pay only **USD 3,000** when you register for both courses together!

Objectives

Project Management Professional Certification Path:

Upon successful completion, participants will be able to:

- Describe basic concepts and principles of project management
- Recognize different styles of influence and adopt different approaches in order to increase influence with their team and stakeholders
- Identify the preparatory steps for any type of project and define clear project goals
- Apply concepts and techniques to develop accurate project estimates and schedules
- Identify and assess the risks involved in project management, by performing qualitative risk analysis and planning risk responses
- Develop effective communication skills to allow accurate project status reporting and project closing

Change Management Fundamentals for Project Managers

Upon successful completion, participants will be able to:

- Explain the benefits of change management for project outcomes and stakeholder satisfaction
- Identify how change management activities need to align and integrate with the project lifecycle and key decision points
- Make informed decisions about the set-up of the change management function vis-à-vis project team structures
- Describe the importance of a clear and unified change vision between the technical and the people side of change
- Adopt effective practices and tools to address the criticality of effective stakeholder engagement and communication
- Explore options to assess their project health status from a change management perspective
- Develop an action plan for their specific project to advance the people side of change

Course methodology

The course has both an online and a face-to-face components. These two components qualify participants for the PMP certification path and also prepare participants for the Project Management Professional (PMP)® Exam.

The PMP application requires 35 contact hours of project management education. This course provides the required contact hours and information needed to apply and prepare for the exam.

The Change Management Fundamentals for Project Manager is delivered through hands-on virtual workshops. It allows time for peer learning with exercises and group work. Case studies and best practices facilitate the application of learning to real-life situations. Participants can apply workshop concepts to cases or their 'change' situations. The design facilitates the transfer of learning to the workplace with the help of practical tools and templates.
