*What is **UN 2.0**? How does it apply to me? My team? Whose responsibility is it? How can we make it real? Where do I start?*

These are common queries, we at the UNSSC receive.

Designed exclusively for United Nations (UN) personnel, our five-day face to face UN 2.0 Bootcamp aims to provide a comprehensive learning experience that is both practical and impactful, supporting the strategic objectives of the [UN 2.0 vision](#).

Introduction

The **UNSSC UN 2.0 Bootcamp** has been specifically designed to align with the UN's forward-thinking culture and cutting-edge skills framework. It aims to enhance the competencies of UN staff who are beginning to engage with the concepts of UN 2.0 and its application to their work across various regions, focusing on the Quintet of Change:

- Innovation;
- Data;
- Digital;
- Foresight; and
- Behavioural Science.

Change management principles, practices and skills will feature across the learning experience so as to raise participants' ability to navigate and facilitate transformation and change in the context of UN 2.0.

The bootcamp will use a modular, flipped classroom approach, combining pre-learning through UNSSC's Blueline Modules and a five-day Face-to-Face workshop, with lead-out peer-support networks.

Course methodology

The Bootcamp will be structured around the following key components:

Pre-learning modules: Participants will complete the Blueline UN 2.0 modules as well as a change management module.

Face-to-face workshop: A five-day workshop will be conducted, focusing on:

- Day 1: Data - Fundamentals of data analytics, tools, data-driven decision-making, and visualization.
- Day 2: Behavioural Science - Understanding decision-making, applying behavioural insights, and practical applications within the UN.
- Day 3: Innovation - Types of innovation, processes, identifying innovative practices, and personal innovation profiles.
- Day 4: Digitalization - Understanding digital transformation, key technologies, and fostering a digital-friendly culture.
- Day 5: Strategic Foresight - Utilizing foresight for better decision-making, exploring future scenarios, and implications analysis.

Interactive sessions: Each day will consist of morning sessions for deep dives into the day's theme, followed by afternoon "clinics" for practical applications, peer-coaching, and contextualization exercises. Change management considerations will be built into the exploration of each of the areas of the Quintet of Change.

Post-Bootcamp engagement: A "learning community" will be established, enabling continued peer support, further contextualization, and ownership of change initiatives. Focus participants will be encouraged to bring their own "project" to focus on during the programme, encouraging ownership and contextualization. Alternatively, an overarching focus could be agreed upon by UNSSC and any client organization in order to scope the programme further to identified organizational priorities.

Course contents

In this programme, you will be exposed to the following content:

- **Day 1: Data** - Fundamentals of data analytics, tools, data-driven decision-making, and visualization.
- **Day 2: Behavioural Science** - Understanding decision-making, applying behavioural insights, and practical applications within the UN.
- **Day 3: Innovation** - Types of innovation, processes, identifying innovative practices, and personal innovation profiles.
- **Day 4: Digitalization** - Understanding digital transformation, key technologies, and fostering a digital-friendly culture.
- **Day 5: Strategic Foresight** - Utilizing foresight for better decision-making, exploring future scenarios, and implications analysis.

Target audience

All UN personnel at headquarters and field locations who are engaged in UN 2.0 or would like to deepen their knowledge on the topic.

This course is available for self-enrollment, or for groups nominated by a UN entity at a different price.

Cost of participation

The Programme costs **\$2,500**. The tuition covers:

Preliminary phase

- Learning needs assessment to customize the programme to your needs.

Core programme phase

- Five days with expert instructors;
- Five peer-coaching sessions to enhance your coaching skills and build your UN 2.0 Project;
- Assignments with individualized feedback;
- A curated moderated online forum to reflect on the learnings from the webinars;
- Readings and resource material that outline key concepts to refer to during and after the programme;
- Optional self-paced modules;
- Unlimited access to a curated online UNSSC e-lounge learning platform.
- Certificate of completion.
